LIDLAW---WOODHULL

A very pretty wedding took place at the home of Mr. and Mrs. B. N. Woodhull on Wednesday Aug. 6th at one o'clock when their daughter, Gladys Mary, was united in the holy bonds of matrimony to W. G. C. Laidlaw of Cardston. Rev. A. H. Rowe of Granum officiated. The bride had chosen a wedding gown of white silk and carried a bouquet of ophelia roses and fern. She was attended by Mrs. H. C. Jopling while the bridegroom was supported by Mr. Grant Laidlaw of Nanton. Just before the Wedding March Mr. Geo. Campbell sang "Until" accompanied by Miss Rheta Campbell. The room was beautifully decorated with sweet peas, roses and ferns when the bride entered with her father to the strains of the wedding march played by Miss Jean Laidlaw of Calgary. The bride's travelling suit was a red flat silk crepe, trimmed with Roman striped trimming, hat and shoes to match. While signing the register, Mr. Geo. Campbell sang "O Promise Me" assisted by Miss Rheta Campbell. This was followed by a recitation by Father Hughes of Granum. A delightful buffet luncheon was served when about forty guests gathered to felicitate the bride and bridegroom. Mr. and Mrs. Laidlaw left for Banff and coast points.

Mr. and Mrs. O. Hagg and family returned from Portland this week. Oscar says there is no place like Alberta.

W. S. Gorache is here from Vancouver on his annual visit and it is understood will remain until after the harvest.

J. Archibald was in town on Friday from Calgary. He states he has a very satisfactory crop in his new location.

While rain is not desirable just now from the harvester's point of view something to relieve the dust nuisance is highly desirable.

Whether it is more desirable to be fined for fishing on a closed creek or for speeding in town is a matter of debate in certain circles here.

Mr. and Mrs. Fred Clever returned from Waterton Lakes where they had been holidaying, making the trip in three hours flat—as far as can be learned a record.

Binders have been going in every direction since the first of this week, and already a considerable amount of grain has been cut. The extremely hot weather has brought the grain in with a rush.

Canada Making Steady Growth

Canada's population on June 1 has been estimated at 9,934,500 by the Dominion bureau of statistics. This represented an increase of 137,000 over 1920 estimate.

In a report issued Thursday, the bureau gave the following figures of the estimated population of each province and territory: Prince Edward Island, 85,000; Nova Scotia, 553,900; New Brunswick, 423,400; Quebec, 2,734,000; Ontario, 3,313,000; Manitoba, 671,500; Saskatchewan 882,000; Alberta, 600,000; British Columbia, 597,000; Yukon, 3700, and the North West Territories, 9600.

The sad news of the sudden death of Miss Lila Edlenoff of Donalds, which occurred on Aug. 6, cast gloom over the Sanderson district. Two brothers in Snake Valley and a sister at Lomond are left to mourn. Miss Edlenoff was a great help in the Sunday school and socially during her residence at Sanderson and she will be missed by many friends there. Diphtheria was the cause of her death.

At present Canada ranks as the third largest producer of electrical energy in the world, with the United States and Germany holding first and second place respectively. The investment in this industry in Canada now amounts to about one billion dollars, that in the United States to eleven billion dollars, that in Germany to 27 billion dollars, and that in Great Britain to one and one-half billion dollars.

Champion took the short end of a 10-2 score on the home grounds last Sunday, Staveley being the winners. Blair Haynes, son of the celebrated Les Haynes, was in the box for the winners.

NOTES AND COMMENT.

That to Canada belongs the credit of recording what was perhaps the first census of modern times may be news to many. This census was taken in 1005 in the small colony of New France whose population was shown to be 3,215. One hundred years later this had increased to 70,000 with an additional 20,000 in what is now the Maritime Provinces. At the commencement of the nineteenth century Canada's population had reached approximately 200,000. Fifty years later it had again increased to 2,384,919, and in the first census after Confederation in 1867, 2,377,000. By the year 1900 the number exceeded five and a quarter millions. It was however within the present century that spectacular expansion took place and the outstanding feature of this expansion was the opening for settlement of Canada's great north west. Immigration which had scarcely exceeded 50,000 per annum totalled two and a half millions in the ten year period from 1903 to 1913, making an increase of 34 per cent in the first decade following 1900, a faster increase than that of any other country in the world. In the second decade it grew 22 per cent, and it may be interesting also to note that in 1871 just under 3 per cent of the population lived west of the Lake of the Woods but fifty years later Western Canada was the home of nearly 28 per cent of the whole.

The change in the number of men employed in the district is even more noticeable this year than last. Even those who are still using binders seem to employ less men than in previous years. In town this limits possible sales to a great extent in practically all lines as the men formerly employed were usually liberal in their expenditures, especially in the days of high wages. In one way present conditions are favorable to employers of labor as compared to former years. The men who worked for a day or two and spent the rest of their time in an attempt to get more wages for less work are no longer prominent. Work is much more appreciated than it was formerly.

The Searle grain report says Reports August 2nd indicates Alta. wheat conditions 77, Saskatchewan 80, Manitoba 91 per cent. Coarse grains Alberta, 81, Saskatchewan 83, Manitoba 92 per cent. Wheat generally filling well although showers now would be beneficial. Cutting already started many southern areas three prairie provinces and will be general except in extreme north by August 15th. Given continuation favorable weather conditions reports still indicate wheat yield prairie provinces 390,000,000 bushels.

The figures annually published as to the number of automobiles in the United States

furnish a recurrent indication of wealth and another occasion for the word "billion" in the American meaning. A little calculation, for example, as to the investment in tires alone on cars in the United States is interesting. More than 25,000,000 cars are reported, each with four tires worth, say, ten dollars each. Total: \$1,000,000,000 worth of "rubber." Perhaps the average value may fall short of ten dollars, but there are enough spare tires to take care of that—Christian Science Monitor.

Prices Of Livestock Reveal Remarkable Strength Compared With Other Farm Products

In the price changes that have taken place in farm products, as also in other commodities, in the last 12 months, livestock food products stand up with outstanding strength. Lambs, hogs, and cattle—in that order—are now at a much higher level relative to the value of the same products a year ago than are butter, wheat, and barley.

Prices for farm products in Canada have changed considerably since last summer and especially during

expressed as a percentage of the prices existing in July, 1929, which are taken as the base of 100. The table on this page gives both the monthly prices and the percentages that each month's price for each item forms of the base price. In the chart only the percentage changes are shown.

A glance at the right hand side of the chart will make it plain that at the end of the period three items, lambs, hogs and cattle, were well above butter and far above wool,

the first half of 1930. The tendency of all classes of livestock, wheat, feed grain, butter and wool, are fairly representative of general farming, has been downward.

A noteworthy feature is that the price level of livestock has not dropped so much as that of other farm products and they are the only items to show seasonal strength within the last two months.

The accompanying chart shows the percentage changes in relation to each other and in each commodity. The monthly average prices as reported officially have been taken and the changes from month to month

wheat, and barley in comparison with prices a year ago.

For two years ago, therefore, it is evident that these three classes of livestock have declined less in price than other farm products and other commodities. They have shown fluctuation up and down, but their general level has been better maintained than in the other items.

If a lesson had to be pointed out it would be that meat-yielding livestock is a more productive form of farm husbandry than it is often considered. This is especially so at present with the low levels reached by grains and other feeds.

Western Flour Mills

Industry Banks First In Manufactures In Alberta and Saskatchewan

The four and grain mill industry ranks first among the manufacturers of two of the three prairie provinces. This industry comes first in both Saskatchewan and Alberta, and second in Manitoba. First position in Manitoba is held by slaughtering and meat packing, which is third in Saskatchewan and second in Alberta. Second position in Saskatchewan is occupied by butter and cheese, which is fourth in Manitoba and fourth also in Alberta. In point of production volume, flour and grain products in Alberta, and slaughtering and meat packing in Manitoba were almost equal in 1928, the former having a value of \$21,000,000, and the latter of \$21,350,000.

Growing Exhibition Grain

Practical Suggestions For Preparing Grain For World's Grain Show

At the recent meeting of the Manitoba Seed Growers' Association at Brandon, Dr. McEntee, agronomist of the M.A.C., gave the following practical suggestions for the growing and preparing of grain for exhibition at the World Grain Show in Regina in 1931.

Dr. McEntee stated that the first essential was to obtain good, clean seed, pure as to variety since the grain samples will naturally be thrown out. The seed should then be sown on clean land to avoid mixing from winter growth. Straw, and from both loose and covered must avoid loss from this source. Sulphur dusting and early weeding would overcome the shattering due to rust damage. A satisfactory sulphur dust can be procured from F. H. Wiley, 933 Henry Avenue, Winnipeg, and a small hand duster from the Niagara Sprayer Company, Middleport, N.Y. An application at the rate of 45 pounds of dust weekly from the time when rust first appears on the plants has usually given a fair control of rust.

In harvesting select the best sections in the field, put out all type plants and any other grain since it is much easier to clean in the field than it is to clean later. Avoid any original material because it is usually later and somewhat coarser. All grain should be left to mature before it is cut. After cutting it may be as well to cure some both ways. If cured outside it should be put up in small sheaves in small bundles, and if inside it should be put up in small bundles, in dry well-ventilated rooms. For threshing a small rubber thrasher has given good results or may be found advisable to thresh it out by hand.

In finally preparing the grain sample it is essential to obtain one with grains of similar size and shape. This can only be accomplished through a great deal of patience, work trying different sieves, different cleaners, etc.—Free Press.

National Map of Canada

Area Of Canada Is Greater Than That Of Europe

The area of Canada is calculated to be 3,984,723 square miles, an area greater than that of Europe. Of this area only a small fraction has been adequately mapped. The Topographical Survey, Department of the Interior, is engaged in mapping portions of the country and is issuing as rapidly as possible sheets of the National Topographic Series of Canada. During 1929 four such sheets were published, nine in 1927, eleven in 1928, and seventeen in 1929.

Creates a New Record

Crop Report For British Columbia Is Very Grating

British Columbia's annual crop report issued by the Department of Agriculture shows that agricultural production for the year 1929 totalled \$52,623,890, which is an increase of \$3,968,647 over that of the previous year and creates a new record. While this increase is due to some extent to prevailing high prices, substantial increases are noted in the volume of production of livestock, poultry products, dairy products, grains, honey, wool, and potatoes.

A campaign to print all menus in English has been started in London.

Creamery Butter Production In Prairie Provinces Shows Increase Over Last Year

Record On The Name Of This River Appears In Year 1783

When Champlain in his ascent of the Ottawa River in 1613, reached what is now the state of the capital of the Dominion, on June 4, he noticed a tributary coming from the north. The river was the Gatineau. Champlain gives no name to it and as far as the Geographic Board of Canada is aware the first record of any name for the river does not occur till 1783. In that year Lieut. David Jones made a report to Governor Haldimand in which he mentions coming "to the River Lettine (Gatineau), and from thence about a league to Shouder (Chaudiere Falls)." Named By Franklin

Bathurst Inlet and Coronation Gulf Named In 1821

Bathurst Inlet and Coronation Gulf were so named in 1821 by the celebrated Sir John Franklin, 1758-1846, who led his first overland expedition to the Canadian Arctic in 1819-22. The Gulf was so named because it was the Coronation year of His Majesty George IV. The name Bathurst Inlet commemorates Henry, Earl of Bathurst (1762-1834), who was, at the time the name was given, Secretary for the Colonies.

Winnipeg Newspaper Union

(By Annabelle Worthington).

Pastures and Proteins

Work Carried Out Which Will Be Of Great Interest To Dairyman

The value of pastures depends very largely on the amount of protein-green feed-available to the cattle using them. In this connection the "close grazing" now being made by experts of the Dominion Department of Agriculture are of special interest. While in the experimental stage the work already done holds much of interest for the dairyman. It is done through the division of a suitable field area into four equal sections. While the herd grazes for a week on one section the new growth, rich in protein, is developing in the others. In this way a new pasture with three weeks' growth of new herbage is regularly available.

British Railways Are Progressive

Railways Preparing To Gain Control Of Air Service

Having acquired the control of the motor-coach transportation in the country, railways of England are preparing to take over the air services. Under powers acquired last year, the railways may operate aeroplanes. As soon as the large cities are in position to provide centrally situated aeroplanes the rail lines will be prepared to run their own aeroplanes for passengers, express and freight, in combination with the train and steamship services. The railways expect to have within a year at least an 85 per cent. interest in all motor coaches in the country.

A coloscope which matches color more closely than the eye has been invented by a New York physicist.

A substance, said to be harmless, has been prepared from green color of vegetables has been discovered in England.

The carvassack duck can fly at a speed of almost 100 miles an hour.

Singapore, British Malaya, is to have a skating rink.

Says Churchill Is Real Port

American Visitor Is Much Impressed With Possibilities Of Northern Route

"Churchill has better prospects for a real port and a real city today than Chicago had when it was first started. The natural foundation for dock structures is stronger also." This was the statement of W. T. Miller, of Eldorado, Ill., veteran contractor of the northern states, made following his return from Churchill.

Mr. Miller is of the opinion the prospects for port facilities are 60 per cent. better and the cost of construction is 30 per cent. less in proportion to what it was at Chicago in the beginning of the city's history. Mr. Miller was accompanied by John Vandyske, also of Eldorado, who has been a locomotive engineer on United States railroads for many years past. He has been in the Hudson Bay Railway for 28 years altogether. Mr. Vandyske says the roadbed on the Hudson Bay Railway is much better than he expected, and is of the opinion it is in excellent condition.

The two visitors said that when the Hudson Bay Railway is completed that tourists will flock to the north and that many will look over various prospects with a view of settling there.

Will Employ Many Men

C.P.R. To Engage Nearly 12,000 Extra Men On Extra Work

Nearly 12,000 extra men are finding employment this summer in the Canadian Pacific Railway's comprehensive program of construction, maintenance and improvement from coast to coast throughout the Dominion.

Construction work of all kinds is being done both directly by the company and also by contractors, the company itself employing some 8,000 men in extra gangs throughout its system.

The work itself is of a very varied nature, including branch line repairs and renovation of right-of-way, bridges, tunnels, stations, coal appliances and buildings of various classifications, including the erection of a new hotel by the Dominion Atlantic Hotel Co. at St. John's, N.B. The men in general are recruited at the closest point to the scene of work and are kept steadily employed until such time as the work is completed, so that a uniform standard may be maintained for judging at shows and exhibitions.

Agricultural Short Course

Course For Departmental Judges Held Annually At Guelph

A short course for departmental judges was held recently at the Ontario Agricultural College. Over 125 were present, including judges of ploughing matches, standing list crops, heavy and light horses, beef and dairy cattle, and sheep and swine. Classes were started some 15 years ago, and are primarily to get judges together for purposes of demonstration so that a uniform standard may be maintained for judging at shows and exhibitions.

CANADIAN NATIONAL POLICE CHAMPIONS

Setting a record unequalled elsewhere in a year in winning trophies, the Canadian National No. 1 Revolver Team, of Winnipeg, in recent contests, captured the Dominion of Canada Open Championship; Dominion of Canada Police Championship; Dominion of Canada Rapid Fire Championship (D.C.R.A. Shield); Dominion of Canada Police Championship (Chief Constables Cup); Provincial Police Championship (Dominion Cartridge Company Cup). The members of the team are: H. Wheatley (left standing); J. W. Brune (right standing); M. Ross (left sitting); R. G. Pickrell (center sitting); Captain J. Garriock (right sitting). Captain Pickrell, who holds the highest individual record in every shoot, now has to his laurels the following honors: Canadian Revolver Championship; Canadian Police Championship; Rapid Fire Championship (Canadian); United States Pistol Championship (Canadian Division); United States Rapid Fire Pistol Championship (Canadian Division); Second Place World's Pistol Championship; Smith & Wesson Shield; Dickinson Cup; Webster Cup; Maitland Pistol Championship; Drevy Cup; Manitoba Revolver Championship; Sir Daniel MacMillan Cup; M.D. 10 Championship; W. Murphy Prize; Canadian Revolver Association's Gold Badge; Highest Aggregate; Birks Medal; Highest Individual Open Championship. Second, Third Place United States Aggregate; Highest Aggregate D.C.R.A. Matches; Highest Revolver Score; Highest Police Score; Dominion Police Championship; Highest Record Score Dominion Open Championship. J. W. Brune holds the United States Intermediate Championship. M. Ross, as a member of the Canadian National team, holds the Novice Championship of Canada.

Yolkless Eggs

Winnipeg Hen Is Responsible For Strange Freak

The exact opposite of the goose of nursery rhyme fame that laid golden eggs is being enacted by a Winnipeg hen. Mrs. Russell McLeod is displaying yolkless eggs produced by this freak member of her pen. She discovered the eggs were worthless when she started out to fry them her favorite style—"sunny side up."

Italy's craze for sports is growing.

"I'm on a diet; I hardly eat anything and only drink water." "Well, wouldn't you like to come and have dinner at my house today?"—Pages Gates, Yverdon.

Automobile Accidents

The majority of automobile accidents are directly traceable to poor health of the drivers, according to a recent report made to the French Academy of Medicine. A commission has been appointed by the Academy to probe further into the study and exert pressure on the government to include a physical examination in the requirements for a driving license.

GIANT DIRIGIBLE R-100 REACHES ST. HUBERT PORT

Montreal.—After a weary wait, Great Britain's giant threat for the supremacy of the skies, hovered over St. Hubert airport, early on Friday, August 1st. Just a little over three days after leaving Cardington, England, the R-100 reached the mooring mast, marking the end of the trans-Atlantic flight. Fabric trouble caused a delay of several hours, and cut down the speed after reaching the Gulf of St. Lawrence.

As newspapermen and ground crew awaited, the dirigible was first sighted 10 miles northeast of St. Hubert at 2:04 a.m. Eastern Daylight Saving Time, and was travelling slowly east toward the ill-fated landing field. Half an hour later the huge, silvery silhouette could be seen, barely moving, at an altitude of about 500 feet above the ground.

The final appearance of the skywarder after many hours of waiting, was the signal for an outburst of cheering from those at the airport. Behind the high fence surrounding the field, too, were perhaps a thousand people who have braved first a scorching day, then a windstorm and rain.

It was not the first time the R-100 had "experienced trouble with its fabric skin. On its first extended flight over England the fabric tore on the tail surfaces and the rear portion of the ship was rather extensively remodelled in an effort to prevent a recurrence of the mishap.

The ship stopped over the island of Orleans for two hours, where repairs were made to the damaged fabric on her fin. The cloth was torn while the high airship was almost within sight of Quebec.

A large square flap of loose fabric was noticed in the top of the envelope. Captain Sir St. Martin of Montreal, pilot of a "movie" plane flew within some miles of the dirigible and noticed that, although barely holding her head in to the wind.

"There seemed to be a tear in the top of the bag," Captain St. Martin said. "She hardly seemed to be moving."

She seemed almost to drift by Quebec, the noise of her motors being hardly audible from the ground.

Soon after passing the Quebec bridge the R-100 opened up her engines and her speed appreciably increased. She was flying at about 1,000 feet.

The shores of the St. Lawrence in the neighborhood of the villages were crowded with people eager to get a glimpse of the monster as she sailed by on the last leg of her trip.

Imperial Conference

Premier Ramsay MacDonald Says Problems of Unprecedented Difficulties To Face London, Eng.—The Imperial Conference must face constitutional problems of unprecedented difficulty, Premier Ramsay MacDonald told a meeting of the United Kingdom Branch, Empire Parliamentary Association, in Westminster Hall, recently.

The year is going to be one of the great, deeply marked years in history, thought the premier. Whoever had the responsibilities connected with the Imperial conference would only succeed by skilfully practicing the art of blending lessons of the past with the outlook on the future. While believing in party government, he got an attempt should be made to get Imperial questions considered first by all parties.

After all, he declared, the commonwealth and the nations which compose it are very much greater than any one party.

Declined To Receive Deputation London, England.—A parliamentary committee appointed to deal with grievances of Indians in Canada, informed a delegation of the National Indian Congress, at Ottawa, Ont., that Hon. J. H. Thomas, Minister of Dominion Affairs, had declined to receive the deputation on the ground the grievances claimed were a matter for consideration by the Canadian Government.

Body Of British Flyer Is Found London, England.—The Evening News carried a despatch from Rangoon which said the body of the British flyer, Eric Hook, when found in the jungle of Burma, was little more than a skeleton. It apparently had been terribly mauled by a leopard or a tiger. Hook was a man whose plane was forced down on an attempted flight to Australia recently. His partner was saved.

W. N. U. 1849

CANADA'S PREMIER-ELECT

Hon. R. B. Bennett K.C., Conservative Leader, whose party swept into power at the recent general elections.

Improved Crop Conditions

Betterment During the Past Week Is Reported In Some Areas

Ottawa, Ont.—Crop conditions have improved, particularly in central Saskatchewan and Alberta, according to the weekly crop report issued by the Dominion Bureau of Statistics. In Manitoba there has been an increase in severity of stem rust infection, some stands in the central and southern sections of the province having infections ranging from 30 to 75 per cent.

The report continues: Western weather since our report of July 18, has been hot, with scattered showers and some good rains. Precipitation was heaviest in southern Manitoba, in central Saskatchewan, and in central and northern Alberta over much the same territory which received beneficial rains during the previous week. The first low temperatures of the harvest season were recorded from northern and southern sections of Alberta and from Victoria, Saskatchewan.

Crop conditions show a further betterment during the week, particularly in central areas of Saskatchewan and Alberta. Frosts, reported to blighted potatoes, are sufficient in the Beaver Lodge sub-station, in the Grande Prairie district. Since from one to seven degrees of frost were recorded, some damage to grain will result, although the extent cannot be determined. With favorable weather conditions, stem rust infection shows a serious increase on the leafy bread wheat of Manitoba, with only slight increases on the lighter stands of Saskatchewan wheat.

The full text of the wire from the Dominion research laboratory at Winnipeg is as follows:

"Weather conditions were favorable for stem rust development in the past week. The extent of the severity of infection on common wheat throughout Manitoba. Some heavy stands in central and southern Manitoba have infections ranging in severity from thirty to seventy-five per cent. Injury already apparent in certain fields of the same. Light stands much less affected. Some fields of early variety have rust at about a week. Only traces rust on durum wheat. Stem rust increasing on barley, severity now ranges five to twenty-five per cent. No decided change reported in rust situation of north-eastern Saskatchewan on July 25. In south-eastern Saskatchewan rust has increased with severity of infection ranging from one to six per cent. on wheat and barley and pustules appearing on necks of plants. Leaf rust found on wheat in Alberta, but no stem rust yet reported."

I.T. County Judge Sent To Prison New York.—W. Bernard Yause, who as county judge of Dutchess County, was noted for the severity of his sentences and who once recommended the whipping post for criminals, was sentenced to six years in federal prison. Judge Yause was found guilty of using the mails to defraud in the case of a defunct Columbia Finance Corporation.

Report Massey Has Resigned Toronto, Ont.—The Mail and Empire in a news feature says: "Hon. Vincent Massey is understood to have forwarded to Rt. Hon. W. Mackenzie King his resignation of the post of Canadian High Commissioner to Great Britain and to have asked that Hon. R. B. Bennett be advised."

Protest Against Use Of Liquor Washington.—A protest against the use of liquor at the British embassy has been received by Sir Ronald Lindsay, from Samuel B. Woods, former Mayor of Charlottesville, Va., and an ardent dry.

BENNETT WILL PROCEED TO FORM HIS NEW CABINET

Ottawa, Ont.—A special session of parliament—probably on or before September 11—is a certainty. Carrying out his promise to form a new government to deal with unemployment "immediately after July 28," Premier-elect Hon. R. B. Bennett is already taking action in this direction as the first step toward the implementation of the pledges he gave during the recent campaign.

Tuesday, September 2, looms as the probable date for by-election day if any minister selected by the Conservative chairman to serve in his administration happens to be opposed.

By-elections will likely be issued as soon as Mr. Bennett takes office as Prime Minister, with nomination day likely set for August 18. In case any chosen minister represents a constituency in which, under the Dominion Election Act, two weeks must intervene between nomination and polling day. The majority of constituencies only require the intervention of seven days.

Probable cabinet selections are the chief topic of discussion among political observers in the capital. In addition, speakers at both the House of Commons and the Senate will have to be appointed. By reason of his ill-health, Hon. Hugh Charles (H. C. Wellington), may be made speaker of the Commons, or George Black (London), may be chosen. If H. C. health, however, is considered to permit his undertaking more arduous duties, Mr. Guthrie will probably be appointed to the cabinet.

Hon. R. J. Manion (Fort William), is another very probable selection. Mr. Manion was postmaster-general in 1926. Hon. J. D. Chapin and Hon. E. B. Ryckman are prominent names mentioned for other cabinet posts.

For the province of Quebec, Sir George Perley (Argenteuil), former Canadian High Commissioner in London, Maurice Dupre, who defeated Gerard Lacroix, in Quebec West; Arthur Durnan, victorious Conservative candidate in the Quebec Vercheres, and Arthur Sauve, former Conservative leader in the Quebec legislature, are mentioned.

Premier E. S. Rhodes, of Nova Scotia, and W. G. Ernst, elected in Prince-Louisburg, are possible appointees from South-Scotland.

For the speaker of the senate, Hon. C. P. Beaubien, Montreal, who was joint chairman at the 1927 Winnipeg convention of Conservatives, is a possible appointee.

Has Nothing To Say

Winnipeg, Man.—Hon. T. A. Crean, Minister of Railways, who was defeated in Brandon constituency in the federal elections, before leaving for Ottawa, said he "had nothing to say" regarding possible plans for his return to the House of Commons by a by-election in some constituency.

"A Great Delinquency"

St. John, N.B.—Hon. J. B. B. Baxter, Premier of New Brunswick, declined the Dominion election result said: "I think Canada has sustained a great delinquency."

GOVERNOR-GENERAL VISITS FIRST CANADIAN HEALTH UNIT

This picture was taken when Their Excellencies Lord and Lady Willingdon visited the County Health Unit in Beauveque, Quebec. This Health Unit was the first to be formed in Canada and has been operating for six years for a number of years with great benefit to the surrounding communities. A motion was made in the House of Commons during the last session asking the Canadian Government to consider subsidizing these small full-time medical departments in rural communities from coast to coast.

SEES TROUBLE BREWING

J. W. Gerard, U.S. ambassador to Germany under President Wilson, who upon recent return to New York from Europe, declares war is brewing between France and Italy.

Emphasizes Independence

Premier Hertzog Says South Africa Has Right To Secede From British Commonwealth

Pretoria, South Africa.—Emphasizing the complete independence of South Africa and her right to secede from the British Commonwealth of Nations if she ever in the future desired to do so, Prime Minister James Barry Hertzog delivered an important speech on the eve of his departure for the Imperial Conference in London, England.

"No lot or tithe of our independence will be sacrificed," he said, "I am convinced we possess complete independence. The people of South Africa will be prepared to go on increasing extent to hearty maintenance in co-operation with Great Britain and the other Dominions. But co-operation will depend on national independence. In no circumstances may the right to secede from the British Commonwealth be taken from South Africa."

India Boycott Continues

Agitators Plan To Intensify the Civil Disobedience Campaign

Bombay, India.—With plans for stiffening the boycott against British goods and intensifying the civil disobedience campaign believed to be its principal agenda, the working committee of the All-India Congress opened its sessions recently.

Only ten of the committee members were present, 21 being in prison on various charges preferred by the government. The sessions, held behind closed doors, were expected to continue three and possibly four days. Vallabhai Patel presided.

Members of the committee said the plans of Sir Tej Bahadur Sapru and M. Jayakar probably would not be considered. They added that the negotiations certainly would not influence the committee's decisions.

Party Standing

Toronto, Ont.—The Canadian Press summary of the standing of the parties in the Dominion elections is as follows: Conservatives, 138; Liberals, 86; U.F.A., 10; Progressives, 2; Labour-Progressives, 3; Independents, 2; Labor, 3; doubtful, 1; total, 245.

Chinese Pillage Homes

Communists Loot and Burn Foreign Holdings

Shanghai, China.—In the most serious devastation of foreign property in China for many years, Communists looted and burned all or nearly all foreign holdings at Changsha, capital of Hunan province.

Foreigners generally were safe aboard British, United States and Japanese gunboats, five miles down the Yangtze River. Four missionaries who elected to remain in the city were unaccounted for.

Damage was done in 50 districts for pillaging. Directed by leaders, the despoilers carried foreign effects into the street as plunder before firing the buildings. Coolies looking on were harangued by the Red leaders, and many were persuaded to join the Communist army to seize a share of property "wrongfully possessed by the upper classes."

Despoilers said foreign consulates, residences and large office buildings on Shuliui Island opposite the city probably would be destroyed. Value of foreign property already burned amounted to millions of dollars. The total could not be estimated.

Saskatchewan Egg Pool

Increase In Prices Over Those Paid In 1929

Regina, Sask.—An increase in prices over those paid for the same period in 1929 is noted in the final payment of the Saskatchewan Co-operative Poultry Producers Ltd., over the season which is now being prepared at the head office here. This payment covers the second pool of the year, which closed Saturday, July 27.

The prices being paid are: Extra, 22 cents; first, 19 cents; second, 17 cents; and extra, 15 cents. They are net cash, f.o.b. shipping point on freight shipments.

NATIONAL WORKS GO UNDER NEW GOVERNMENT

Ottawa, Ont.—The tide of party success ebbs and flows but the great national undertakings of the Dominion go on. Several governments have come and gone since the work was first begun on the Welland ship canal. It was to have been officially opened on July 1, with a Liberal minister being designated to the ceremony had to be put off and now a Conservative government will be in office for the first time.

It was not expected the date for the opening will be fixed for some time.

Since the case of the Hudson Bay Railway, the driving of the last spike was planned for last fall but these plans were changed. It was decided to have the celebration on the occasion of the opening of the ocean route rather than at the completion of the railway.

Therefore, the new government will be in office at the completion of these works started many governments ago.

The probability is that the new ministry's greatest undertaking will be the Hudson Bay Railway deep waterways. This prospect makes the portfolio of Minister of Railways and Canals one of the most important in the government, even more because of the canals than the railways. That is why many people in the city are expecting Premier Howard Ferguson to be the one selected to fill that position.

It is interesting to trace the lives of governments alongside such works as the Welland ship canal or the Hudson Bay Railway. The first contracts for the railway were let by Rt. Hon. George P. Graham as Minister of Railways and Canals in the Laurier Government, in 1910. This was for one section. Then the government of Sir Robert Borden came into office and the contracts for two other sections were let by the Conservatives. Nelson was then the objective.

Work proceeded through the Conservative tenure of office and into the time of the Unionist regime. It was discontinued in 1914 because of the stress of the war. The government of Mr. Meighen came after that, and in 1921 the government of Mr. King took office. In 1926 the terminal was shifted from Nelson to Port Arthur, and the railway to that point was completed last year. The port construction and the aids to navigation are in course of construction.

The work on the Welland Canal was started under the Borden government in 1913, and continued until the war stopped it in 1917. It was started again under the Unionist government in 1918 and has been continued ever since.

MANY CHANGES IN PORTFOLIO OF IMMIGRATION

Ottawa, Ont.—Who will be the next minister of immigration? Many names are being forecasted. Some think that Mr. Meighen will get the post. With the change of government the conference on immigration will not likely be held at least until after the Imperial Conference.

Immigration has had more variety in the matter of bosses during the last ten years than any other department of the government. Before 1921, Hon. James Calder was minister of immigration. Previous to the elections of that year however the cabinet was reorganized and Hon. Dr. J. W. Edwards took over the portfolio. The same day at the same time the Meighen Government was better.

In fact, when Mr. Meighen was named Mackenzie King first gave the immigration portfolio to Hon. Charles Dummer. The last time in 1925 however, Hon. James A. Robb took it over and held it until the reorganization of the cabinet before the 1925 elections. Hon. N. Gordon was then made minister of immigration. He met defeat in the elections and the department came back to Hon. Charles Stewart.

During the brief Meighen regime in 1926, Hon. Dr. Meighen was minister of the department for a short time and then Sir Henry Drayton, who was formerly in the same position, was named. Hon. Robert Furke became head of the department and remained in that position until December 1929, when he was named to the job came back to Mr. Stewart once more. The present minister is Hon. Charles Stewart. The election campaign kept him in the west and papers of what he had to do came were forwarded to him there. Now there will be a new minister, but what a new minister or two in the life of the immigration department there have been ten changes in nine years and another one coming.

Change Permit System

New System Of Liquor Permits To Be Introduced In Ontario

Hamilton, Ont.—Introduction of a new system of liquor permits under which the total amount of purchases will be designated in dollars and cents, was announced by Sir Henry Drayton, chairman of the Liquor Control Board, at the convention here of the Chief Constables Association of Canada.

This was one of the measures decided upon to curb the abuse of liquor purchases by recognized permit holders in Ontario.

Admitted by a delegation Sir Henry admitted there were faults in the present Ontario system, but, he declared, the new system would have the free sale of beer in stores or in parlors."

A dangerous criminal sought in connection with a major crime usually is safe in jail while serving a nominal vagrant charge. This was the idea behind the new system, S. W. W. of Windsor, in a paper advocating for police departments the privilege of taking fingerprints and photographs of persons held on charges of vagrancy.

Want Wider Markets

British Columbia Lumbermen Look To Britain For Sale Of Products

Victoria, B.C.—Urging a greater participation in the British markets by B.C. lumber and asking that a delegation be sent to the Imperial Economic Conference in London, to further this aim, a delegation representing the lumbermen of the province waited on Premier S. F. Tolson, recently.

The lumbermen described conditions in the province as being exceedingly unfavorable at the present time. Prices were falling and demand was shrinking. The British market was the only one which showed possibilities of expansion.

Wheat For China

Surplus Wheat From United States May Go To Famine Stricken Areas

Wakenfield, Kansas.—Senator Henry F. Ashurst, in an address here, said that prospects were more hopeful than that of this country's surplus wheat would be sent to the famine districts of China.

President Hoover and Chairman Alexander Legge, of the Federal Farm Board, this summer are studying the possibilities of distributing wheat in the famine areas of the world. The situation of the Chinese Government.

CHAMPION CHATTER

VOL. 3 Thursday, JULY 31, 1930 No. 33

Published in the interests of the People of Champion and Farmers of this vicinity.
GEO. L. DEPUÉ, Editor

News item: Goffe drives one hundred and seventy-two yards through the rain. Must have been a driving rain!

We unloaded a car of that good Mc-Drig Big Ball Twine this week.

Wm. Penn Motor Oil "Still the Best."

Archie Buggles has ordered one of those new Duplex Mc-Drig rod wheels.

"Do you think that auto are ruining the younger generation?"

"No, I think the younger generation is ruining the auto."

From all appearances nearly every one has sold his wheat. It's going up.

The original Big-Ball Twine is plainly marked "Good Equipment Makes a Good Farmer Better."

ed "McCormick-Deering" fifty guaranty against breakage or waste.

Keep your head low, and then will miss many a bump. Keep your eye on the fellow who's sawing—not saying.

Have you a harvester? They are becoming mighty popular around here, which means there will be a lot of grain hauled out of rough stubble fields and direct to elevators during next harvest. That's where the International "Six-Speed Special" Truck shines. Six speeds forward and two reverse for power plenty in the hard going and all the speed you can use on the road.

C. Davis has taken on a Mc-Drig 16 ft. swath.

Ten feet at a clip, right around the field, and that means cutting your crop at the rate of 40 acres a day. That's the pace set by Mc-Drig tractor binders.

When may we give you a real demonstration of the International "Six-Speed Special"?

The gold-digger believes that beauty is as sure a dough.

Bill Porter is sure a booster for his Mc-Drig combine. Bill says it makes threshing a family affair all right.

"Can you trust your wife alone."

"Yes, alone."

The human jaw is said to be growing smaller. That's funny in view of the way that it is constantly exercised.

Wm. Penn Motor Oil "Still the Best."

H. Anderson of Okotoks is visiting his brother J. C. Anderson.

T. R. Jopling continues to improve at the Holy Cross hospital.

Mr. and Mrs. Sam Ellis of Three Hills are visiting Mr. and Mrs. Peters.

Found—Shoe for right foot, with pance sole. Owner apply at Chronicle office.

Morley Haynes of Calgary is on an annual visit to Mr. and Mrs. J. McFatt.

Nels Johnson, late of Cadomin but now of Calgary was a visitor here this week.

Mr. and Mrs. Peters of Three Hills have rented the H. Higgins residence.

Miss Clark of Chilliwack, B. C. is visiting her sister, Mrs. N. J. Patterson.

B. M. Roberts of the Hudson Bay staff at Keho was a visitor for a short time on Tuesday.

James Beggs, who has threshed with Jack Doyle for some years arrived in town recently.

Eddie Weiss and family returned last week from an extended trip through the coast States.

Born—To Mr. and Mrs. Roy Taylor at Mrs. Milliken's maternity home, on Thursday, July 31st, a son.

J. W. Murphy of Travers started to cut wheat on July 31st, in a short light crop.

Mr. and Mrs. F. M. Watts returned this week from Rimby where they had been on a visit to relatives.

V. S. McClure was taken suddenly ill on Sunday and his condition caused alarm for a time but he has since almost completely recovered.

Wheat has been shipped from local elevators quite freely during the past two weeks, evidently in preparation for the new crop.

J. M. Moffatt and Kelly McLean have joined the Vulcan band and have taken part in concerts at Buxton, Staveland and Lomond recently.

With the transfer of the stock to the new premises completed, J. D. Henderson now has one of the finest drug stores to be found outside the cities. Full advantage has been taken of the increased room in displaying the fine stock and the public will join the proprietor in being proud of the new drug store.

Hear Ian Keith singing (The End of The Lonesome Trail) Wed. Aug. 13. The Great Divide, 100 per cent. talking, singing, dancing.

Hear 150 mixed voices in the Spanish festa.

See and hear the West in all its glory.

As big as the heart of the West. The Great Divide, Wed. Aug. 13th.

Ole Running is now engaged with the oil crew at the Lake Keho well.

Mr. and Mrs. F. J. Clapp and nephew Harold Fields spent Sunday at High River.

Mr. and Mrs. Walter Embree are here on a visit from Amarillo, Texas. Mr. Embree is a son of Mrs. O. E. Hargraves.

Mr. and Mrs. Byrne, of California are here on a visit to the latter's father, V. S. McClure.

Dressmaking, plain sewing and all kinds of mending at very reasonable prices. For further information phone 74.

The wheat pool has not needed to use the provincial guarantee having sold sufficient wheat over the dollar mark to offset that sold below this price.

Miss M. Lawrence wishes to thank the B.P.O.E. for flowers sent, and also many friends for kind remembrances during her illness in the Galt Hospital, Lethbridge.

The August meeting of the Champion Women's Institute is to be held at the home of Mrs. Guy Dow on Tuesday Aug. 12th at 2:30 p.m. Refreshments, Mrs. Watkins.

This week has been a particularly trying one for grain all over Canada and the United States as well as in Europe. In consequence wheat has advanced several cents in price. Locally the grain seems to be well filled despite continued hot weather, but the yield will undoubtedly suffer to some extent.

The Champion Community exhibit won the first prize at the Carmangey Fair, and the committee in charge are receiving congratulations on every hand.

Bob Ashmore of Fernie is visiting relatives in this vicinity.

K. R. McLean, R.O., of McLean & Anderson, Sight Specialist 208-8th Ave West, Calgary will make his monthly visit to Champion Friday, Sept. 20th, at the Drug Store.

The Hudson Bay well northeast of Lomond has struck a small quantity of oil in the limestone and prospects of a crude oil well are excellent indeed.

Col. J. H. Woods, managing director of the Calgary Herald, is rumored to be the choice for the lieutenant governorship of Alberta, to succeed Dr. Egbert.
